

## H2O Compact Calculator

- **Water Powered**
- **8 Digit Display**
- **Compact & Light Weight**
- **Ergonomically Designed**
- **For Professional or Home Use**

The new H2O Compact Calculator from Tango Group is the latest in ecological and environmental design. Incorporating the revolutionary and patented, H2O water powered battery, together with conventional digital technology, the H2O Compact Calculator offers the user an environmental design solution for a product that is used in every day home or office life.

This has all been made possible by groundbreaking developments in portable power technology operated by an inexhaustible resource - "water". The patented technology utilises two electrodes consisting of specially formulated alloys, one positive, and the other negative. When immersed in water an electrochemical reaction takes place resulting in the production of electrical energy.

To maintain a constant supply of energy simply refill as the water evaporates, typically every 2 to 3 months. The H2O water battery has a minimum continuous life of at least 2 years. In addition to this, the H2O water battery (unlike all other conventional batteries) can be stored in its dry state indefinitely and can be left to dry out at any time during its life and its life extended indefinitely.

As all the components of the H2O water battery are recyclable, the benefits over traditional batteries are countless. Every year billions of conventional dry cell batteries are used, and the recycling of such waste is not only expensive but often incomplete, resulting in hazardous pollution and damage to our environment.

**Replaceable H2O Water Battery**

The H2O Compact Calculator is designed and manufactured for both professional and home use in mind. By just adding water you are providing your product with an endless source of energy. At the end of the H2O water battery's life (indicated by dimming of the display) simply replace the battery and start all over again. (Replacement water powered batteries are readily available from Tango Group Limited).

Unlike conventional solar powered calculators the H2O Compact Calculator can be used in all light conditions... no more fading displays at that critical moment. The H2O batteries are easy to refill and can provide constant power for up to 3 months with just a few drops of water.

Not only is the H2O Compact Calculator environmentally friendly, innovative and ergonomically designed, it has a large 8 digit display and keyboard and offers all the functions demanded by professional users.

### Dimensions

**Product:** 75 x 18 x 110 mm 75 grams  
**Packaging:** 85 x 22 x 115 mm 85 grams  
 (80 units per shipping carton)

RoHS   

Tango Group Limited  
 The Coach House  
 Zoons Court, Gloucester  
 GL3 3NE, UK
